

FDtechnologies

Financial Year: 2024

Net-Zero Pledge

Our company wishes to join the growing group of leading companies that are setting emissions reduction targets in line with Science-Based Targets. By doing so, we recognise the crucial role the business and construction community can play in minimising the risk climate change poses to the future of our planet

FDtechnologies commit to develop a science-based target aligned with the SBTi criteria, submit the target to the SBTi for validation and publish our approved targets within a maximum of 24 months. We commit to reducing our Scope 1 & 2 GHG emissions 50% by {Target Year} from the Base Year below and 100% by 2050. We commit to measuring and reducing our Scope 3 mandatory and operational emissions in line with Science Based Target (SBTi) requirements. We will complete the above by implementing the following:

- + A Net Zero Carbon Action Plan
- + Engage with 80% of our Scope 3 supply chain by 2025
- + Monitor and track our carbon emissions monthly via carbonfit
- + Implement the recommended actions & projects to start reducing emissions immediately
- + Review our management policy to ensure responsibility is delegated and actions monitored Net zero target year : 2050
